HOW TO PLAY

Hitting the ball

When the ball is in play, an "X" will appear on the ground. This shows you where the ball is going to land.

To hit the ball, go to the mark and press the A Button when the ball gets to you. Remember that in beach volleyball, the ball can only be hit up to 3 times on each side. The first hit will always be a "bump". The second hit will usually be a "set". And the third hit will hopefully get the ball over the net (spike it if you can!) To do a spike, use the B Button to jump into the air, then hit the ball with the A Button. As on a serve, you can control the direction of the spike with the  Control Pad. To do a SUPER SPIKE, after you jump, press the B Button 3 or more times while you are in the air. If you do this correctly, your hand will begin to glow. Then hit the ball with the A Button and KABOOOM! The timing of a SUPER SPIKE is a bit tricky, but well worth the time needed to perfect it.

Serving

To toss the ball, press the A Button. To hit the ball, press the A Button again when the ball is within reach. To do a jump serve, press the B Button to jump after you toss the ball (don't forget to press the A Button again to hit it!). You can also control the depth and direction of the serve by using the  Control Pad when you hit the ball. Practice makes perfect!

Blocking

In order to block a spike, you must get your player right next to the net where the spike is about to occur, then press the B Button to jump. It is even possible to block a SUPER SPIKE if you're quick enough. Just press the B Button as fast as you can while you're in the air!

Diving Shot (Dig)

If you aren't close enough to the ball when you try to hit it, your player will automatically dive for the ball.

Tips

The key to Super Spike V'Ball is practice. When just starting out, play a few games in the EXERCISE mode to get the feel of the game.

Teamwork is also very important. Work with your partner. Being a "ball hog" will often result in losing a point.

INTRODUCING THE PLAYERS**GEORGE & MURPHY**

George and Murphy were the champions last year! They are very well balanced players. When just starting out, this is the easiest team to use.

**AL & JOHN**

Former soldiers, Al and John have a lot of power, but have poor defensive technique and are pretty slow. If you like to use the "SUPER SPIKE" often, this is the team to play with.

BILLY & JIMMY

Billy and Jimmy have been trained extensively in the martial arts. Their defense is superb. They do have a weak spot though — poor spiking power. Use them for a great defense against teams that spike often.

**ED & MICHAEL**

Ed and Michael are the quickest players on the V'ball court. Their hitting power is average. Choose them if you're having trouble getting to your opponents shots.

TEAM AND PLAYER SELECTION

★ TEAM SELECTION

Each team has its own unique characteristics. Some teams are very fast, some are excellent at defense, while others are good passers. Try to find the team that has the best overall skills, or pick an underdog team and see how far you can go! In the 1P (player) or 2P Tournament games, you or your teammate will select a country to represent. In the 2P (player), 3P or 4P Match games, each team will select a country to represent.

★ PLAYER POSITION

Just like the team selection, each player has his own unique set of characteristics. Since you only control one player and the computer controls the rest of your team, experiment with different players to find the athlete with the best overall skills. To change the players position, move the cursor to "YES" and select with the A Button. Assign a player to each position using cursor and A Button. The player with the roman numeral I is the player you control (the roman numeral II will appear next to the second players name in multiple player games).

PLANNING YOUR GAME STRATEGY

Planning your strategy is very important to winning each game. In order to make it to the World Cup finals, you must learn different techniques and to make adjustments to your opponents game plans. To plan your game strategy, move the cursor to the option you want and select with the A Button. Once you have decided on a game plan, move the cursor to the exit box and press the A Button to begin play.

YOUR OFFENSIVE STRATEGY?

Do you want your teammates to pass you the ball or do you want them to dribble the ball up the field. If you choose to have them dribble the ball up the field, you can ask them to pass you the ball by pressing the A Button.

SHOULD THE GOAL KEEPER (G.K.) JOIN IN?

Need a quick score? Pull your goalie and have an extra person on the offensive end. But remember, if you pull your goalie, the other team has a better chance of scoring because your goalie may not get back to defend the goal in time.

SHOULD YOUR TEAMMATES SHOOT?

Sometimes its helpful to get the little extra scoring punch from your teammates. You decide if they should shoot the ball frequently, only sometimes, or not at all.

YOUR DEFENSIVE STRATEGY?

Should your teammates try to tackle your opponents, or should they try to just mark (covering a player on defense) them until you tell them to tackle or slide with either the A or B Buttons.

Not every team is the same. Plan your strategy carefully for each team and make any necessary adjustments during the halftime. Defeating all the teams and capturing the World Cup Trophy will depend on how you prepare for each match!

HOW TO PLAY

By using the  Control pad in conjunction with the A and B Buttons, you can control the offensive and defensive moves of your player and your teammates.

★ OFFENSE

Dribbling

When you have the ball, you can control your dribble by moving the  Control Pad in any direction.

Passing

If you want to pass the ball to a teammate, press the A Button and the computer will automatically pass the ball to your nearest teammate. If a teammate has the ball and you would like them to pass the ball to you, press the A Button.

Shooting

By pressing the B Button and any direction on the  Control Pad simultaneously, you can shoot the ball to that area. You can also ask your teammates to shoot the ball by pressing the B Button.

Super Kicks

By pressing the A and B Buttons simultaneously or simultaneously with the  Control Pad, you can activate that player's Super Kick. These are powerful kicks that are very hard to block. Because they are difficult for the players to do, you are limited to five Super Kicks per half.

High Power Kicks

Once you have used all your Super Kicks, you can still have a powerful shot. This High Power Kick is activated by taking a certain number of steps before shooting the ball with the B Button (some players are very strong and don't need to take as many steps to activate the High Power Kick).

★ DEFENSE

Tackling & Sliding

If you are near an opponent who has the ball, you can tackle him by pressing the A Button or slide into him by pressing the B Button. If a teammate is closer to ball handler, you can ask them to tackle or slide into the opponent by pressing either the A or B Buttons.

If you are close enough to your opponent when you tackle or slide, you can usually take the ball away from him and temporarily knock him down. If a player is hit often enough or hard enough, they will stay down until a goal is scored or the half ends.

Be sure and check the players communication box at the bottom left hand corner of the screen. Talk with your teammates, using either the A or B Buttons. They will tell you what their next action will be.

★ CORNER KICKS AND THROW-INS

If the ball is kicked out of bounds over the endline or across a sideline, the computer will automatically send a player to get the ball and throw it back into play.

PASSWORDS

In the Tournament mode, you will be given a password at the end of every match. Write this number down for future reference.

Once you have a password, you can begin a match from the last game you have won. To enter a password, press up or down to select a number, then press left or right to select the numbers position.

HOW TO PLAY 2P, 3P AND 4P MATCH GAMES

For multiple player excitement, use a NES Satellite or NES Four Score to challenge a friend or team up with another in the ultimate dream match.

NES Satellite™

NES Four Score™

When a multiple player game is selected, each player or team can use the  Control Pad to select a country to represent. Once the teams have been selected, you can choose the conditions of the playing field for added challenge.
